

Why Engage with Maule Systems

Gold Partner status backed up by 12 years of Novell and Microsoft experience in Ireland and the United Kingdom is why. If your organisation already has a Novell product deployed and are looking to get the most from it, or integrate additional products, then we have the proven experience and relationships with Novell to make your project a success.

If you are not using Novell but are looking into new capabilities then we can assist you to develop a road-map for their deployment.

Migrations are a fact of life. Many organisations need to consolidate under one major OS. We have the experience and expertise to make your migration a smooth one.

Desktop migrations are another area that we have extensive experience in automating and simplifying.
